About production factory change

Thank you for your continuous help and support as always.

We are pleased to announce that we will change the production location, marking method and grease as follows for the slide switch which we are currently delivering to your company.

1. Product subject

Slide switches CUS, CSS series

2. Changes

①. Production location change

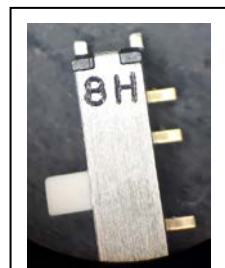

C U S series、C S S series

	Current production location	Production location after transfer
Production location	Zhuhai City, Guangdong Province, China	Van Lam City, Tinh Hung Yen Province, Vietnam

②. Marking method

C U S series

When changing the production location, CUS series will be changed from ink marking to laser marking. CSS series will continue ink marking.

Example of ink marking

Example of laser marking

③. Grease change

C U S、C S S series

When changing the production location we will change the grease.

Before	After
Fluorine grease (semisolid)	Fluorine-based dry file lubricant (semi-wet)

3. Reason for change

①. Production location change

For productivity and supply stability

②. Marking method change (only C U S series)

For productivity and quality improvement (when changing production location)

③. Grease change

For productivity and quality improvement (when changing production location)

4. Change time

The change will start from July 2019.

5. Product identification method

We are planning to distinguish them in the lot after "Lot.No.9G".

6. Request

Please mention as soon as possible if there is an authentication procedure.

For any question please feel free to contact our sales representative.
