Subject: Obsolescence of the TO-3P package of the LT1033, LT1083 and LT1084

Linear Technology Corporation intends to obsolete the LT1033CP, LT1083CP (-5 & -12 versions) and LT1084CP (-5 & -12 versions). The reason for this obsolescence is the limited life span of the single Gold Ball bonder in existence at our subcontract manufacturer for the TO-3P package.

We understand that this product obsolescence could potentially impact some part of your product offering; therefore, Linear Technology will be offering a Last Time Buy (LTB) opportunity in accordance with the schedule below:

LTB Orders Accepted Starting:	October 1 st , 2014
Final Orders Accepted:	March 31 st , 2015
Final Shipments:	March 31 st , 2016*

We recognize the need for continued support and coordination between our companies during this transition and so, we have provided this six month order placement window, followed by an additional twelve month window in which to receive shipment. If we can provide any additional design or technical assistance please feel free to contact a Linear representative at www.linear.com/contact for details.

* Orders are non-cancelable and non-returnable. Actual delivery dates will vary due to individual manufacturing and scheduling requirements

Very truly yours,
Linear Technology Corporation
